

SEALEZE® Fruit and Vegetable Processing Brushes

SEALEZE® Fruit and Vegetable Brushes offer nylon, polyester or polyethylene for washing; horse hair or a mixture of hair and fibre for waxing; and fibre brushes & felt discs (“donuts”) for drying.

Applications

- First wash treatment
- Washing
- Drying
- Waxing
- Division on sizes
- Packaging and expedition

Why SEALEZE®

- 100% unwavering quality
- Designed and engineered in the USA
- Brushes are made exactly for machine’s needs: manufacturers show concrete drawings of brushes needed

Important to Know

- A poor quality brush may cause significant damage in a season’s production.
- It is important to determine which is the most suitable brush for each application work which is going to be done (washing, waxing, drying...) and the product which is being to be treated (orange, apple...).
- Each region may have different products and different brushes.

SEALEZE® will work with your team to meet your business needs. We can engineer our brush to fit into your production platform.
